

WIRELESS CHARGING PAD

Please read through the following instructions before using your new wireless mobile charger.

IMPORTANT SAFETY INFORMATION

The charger has been designed with the highest concern for safety. However, any improper use of the charger has the potential for property damage or personal injury. To help ensure accident-free use, follow these guidelines:

1. Regularly inspect the charger for any damage.
2. If the charger has been damaged, stop use immediately.

Important Information Before Use:

1. Charger should be used for its intended purpose according to the instructions.
2. Do not submerge underwater. Do not expose to liquid, smoke, or steam.

Finding a Power Source

1. Connect the micro USB charging cable to the charge pad.
2. There are a few ways to plug and power your charger.

a.

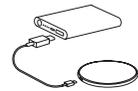

Connect to a USB port on a computer.

b.

Connect to a USB AC wall adapter.

c.

Connect to a mobile power bank, anywhere.

Charging Your Phone

Your smartphone must be Qi-enabled in order to charge your phone wirelessly. Qi-enabled technology is another name for wireless or inductive charging.

1. If your phone is Qi-enabled, simply place your phone on the charge pad. You'll see a blue light turn on to know it's charging.

Tip: Other devices may be Qi-enabled like the Apple Smartwatch. Check and see, you might just have some gadgets laying around that you didn't know you could use with your charger.

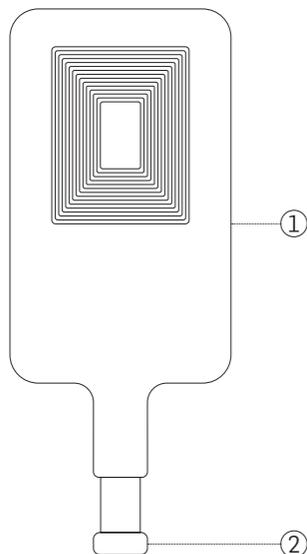

2. If you've found that your phone isn't Qi-enabled already, adapters are available.
